#### SECOND WEEK!

TWELFTH DAY OF OUR TWENTY-FOURTH

## Semi-annual Clearance Sale

### ABOUT HAMS!

Yesterday we advertised the sale of the third invoice of those choice SUGAR-CURED STAR HAMS, at 10 cents per pound. The buyers came with a rush, and in less time than it takes to write these lines the entire lot was gone. Doubtless the price and quality had something to do with their sudden departure. To the many intending buyers in attendance, who were disappointed in having their orders filled, we will say that the fourth lot will arrive in a few days, of which due notice will be given in these columns-sufficient in quantity to supply at least one hundred customers.

A saving from 10 to 30 per cint, can now be made by purchasing your

I take pleasure in certifying to the medicinal properties of the Ætna Mineral Waters. It is not from a mere cursory investigation, but after a year's constant use of the Ætna that I am convinced of its splendid remedial qualities. As a general regulator of the system it cannot be too highly praised. From my own personal experience I believe it will prove a blessing to those who use it.

Proceedings of the Board of Trade Convention at Oakland.

SAN FRANCISCO, August 2d.—[Special.]—The on cention of Boards of Trade of Central and Concention of Boards of Trade of Central and Northern California, which organized temporarily two weeks ago, met again at 11:30 this morning to effect a permanent union, for the purpose of advertising that part of the State lying north of the Tehachapi range, and particularly to invite to the valleys and slopes in the districts represented by them a part of the immigration coming westward this winter.

A. T. Hatch, of Solano, presided. The Convention held a heated discussion as to the admission of proxies, many of which were held by delegates. A motion was made that only those delegates present should be allowed to vote. When a division was asked there was a tie vote, and Chairman Hatch cast the deciding ballot in favor of the motion. and Chairman Hatch cast the deciding ballot in favor of the motion.

The report of the Committee on Permanent Organization was adopted. It provides for an Executive Committee of one delegate from each county represented. Effey, of Santa Cruz, moved an amendment making the committee consist of one member for each Board of Trade represented. Lost.

A contest on the question of the location of the Central Bureau of Information is expected. There are no delegates from San Francisco. The Convention decided to leave the selection of the place for the Central Bureau of Information to the Executive Committee of one member from each county represented. Until the committee decides, the Bureau will be located in the Board of Trade rooms in Oakland.

Mr. Robinson, with a view to obtain the sense of the meeting, moved that San Francisco should be the place of permanent headquarters. A motion to lay on the table was defeated, and the motion was carried.

The report of the Committee on Constitution was then taken up. It was referred to the as then taken up. It was referred to the kecutive Committee, with power to adopt.

A. T. Hatch was elected permanent President the State Board for the ensuing term. It was decided that the remainder of the of-pers be appointed by the Executive Committee.

SALT LAKE, August 2d.—The returns are not all in of yesterday's election, but the Gentiles elect two, and perhaps three, members of the Council Branch of the Legislature in a total of twelve, and three, perhaps four, members of the lower House, out of a total of twenty-four. The Gentiles consider this a victory, being by far the best they have ever been able to do.

WOODLAND'S SENSATION. Mrs. Moore Declares She Will Have Her Love at Any Price. Copyright, 1887, by the California Associated Pres

Seeing among the testimonials of the Ætna one signed by my old friend, L. A. Murch, who fought Indians with me under my command over thirty years ago, I was induced to try a case of Ætna Mineral Water. I was four years ago taken down with paralysis, losing the use of my right side, and I suffered in consequence from dyspepsia, neuralgia, kidney disease, loss of eye-sight, hearing and speech. I commenced to use Ætna the first of last month, drinking a large glassful twice a day, one in the morning on arising and the other at night. I felt the happy effect it had on me from the commencement. I find my old friend Murch's testimonial true to the letter, for it is having the same splendid effect on me.

WOODLAND, August 2d.—The Moore-Black affair still coutinues to be the leading topic in Woodland, and the general interest and excitement has not abated. Your correspondent interviewed Black this morning. He says the wedding is bound to come off, as he and Mrs. Moore are both determined. Mrs. Moore also says she will spend \$20,000 before she will give up her idea of the marriage. She departed this morning for Sacramento, and many people think that Black will follow and the wedding take place down there. Robert Moore, her son, residing at Reno, Nev., has been telegraphed for and is coming. It is thought he will have great influence with his mother. Public opinion is now against Mrs. Moore and her youthful lover. The examination of the latter on a charge of felony comes up to-morrow at one o'clock, and great interest is manifested in the outcome. Dear Sirs—I am most happy to render the following statement: I had been afflicted with dyspersia, and for a long time suffered its agonies, and had also much trouble from insomnia and dryness of the throat, the result of dyspepsia. By chance I happened to drink a bottle of Etna Water and found it relieved me from the dryness of the throat. I continued its use and my dyspepsia left me, and I can now sleep as well as I ever did. I have recommended it to many of my acquaintances similarly afflicted, and they have experienced the same grateful results.

PORTLAND, August 2d.—A small-sized battle occurred last Saturday on an island in the middle of the Columbia river, opposite Pilot Rock. The scene of the fight is a bank of sand, which is bare at low tide and used as a seining ground for salmon by George Elliott and Charles Woods. They disputed as to their respective fishing territories. Each employed several men, and the employes sided with their bosses. From the best information, Elliott was the attacking party. He had six men, and drove the Woods party from the island. The defeated crowd escaped in boats. One of the Woods men was wounded in the arm, and another, named Douglass, had one leg so badly shattered that amputation will be necessary. Some of Elliott's men were armed with Winchesters.

NEARING THE TOP.

The Chicago Team Scores Another Very Easy Victory.

Chicago, August 2d.—To-day's game was a slaughter. Whitney, who pitched for Washington, was rapped hard and constantly, and his colleagues made too many errors. This tells the whole tale. The weather was very hot, but the attendance good. Van Haltren made two runs. Score-Chicago 10, Washington 3. A VICTORY FOR NEW YORK.

PITTSBURG, August 2d.—The New Yorkers sustained their reputation to-day of being heavy hitters. They had McCormick's delivery completely solved and knocked the ball repeatedly to every portion of the field, earning thiteen of their seventeen runs. Keefe was also hit rather freely, but the good fielding of the New Yorkers kept the Pittsburgs down to four runs. Attendance, 2,500. Score—New York 17, Pittsburg 4.

INDIANAPOLIS, August 23.—Healy was put in to pitch to-day for the third consecutive time, and the consequence was he was batted unmercifully by the Bostons. The visitors played an almost errorless game, while the playing of the home team was loose and lacked the vim necessary to win. At the end of the sixth inning a reporter asked the umpire something about the scoring of a Boston run, when Captain Kelly stepped forward and without apparent cause, and in a very ungentlemanly manner, delivered an offensive tirade against the representatives of the press. He was roundly jeered and hissed by the crowd for his ill-mannered utterauces. Score—Boston 16, Indianapolis 3.

New York, August 2d.—[Special.]—The Commercial Bulletin says: "Signs of commercial progress are visible in almost every direction on the Pacific coast, though we on the Atlantic coast are apt to overlook them until confronted with facts that compel attention. One of the most significant of these facts is the steady increase in transportation facilities. The International Steamship Company of Mexico, for instance, will soon have vessels plying below San Diego and twenty-four ports in Mexico and Central America, the terminal point being San Jose de Gautemala. The Montzerrate, a large 1,600-ton steamer, is now on the way from Europe, and will arrive by September 1st. Another of the same size is ready to send out.

"The guano trade at Ensenada is growing rapidly, shipments averaging 2,000 tons per month. The Romero Rubla is engaged as a dispatch boat on the Gulf of Mexico in connection with this trade. The Louis Hiller is also employed on the Gulf in the same interest. Ensenada, 70 miles from San Diego, has a thousand inhabitants. A \$100,000 hotel is going up. Fifteen miles away are the Punta Banda Hot Springs, at which a \$200,000 hotel is about to be erected by Chicago capitalists. San Quentin, 105 miles south of San Diego, has a fine harbor, with 18 feet of water at low tide. Not far away are some mines the product of which is said to be sent to Liverpool. The losses and gains in the central part of the State are about equal. From the mountains the returns are very meager, but both parties are claiming gains in that section. Altogether, the returns point to an aggregate Democratic loss, as compared with the vote for Knott four years ago, sufficient to cut Buckner's majority to \$5,000, or less. Butchered His Mother.

EATON (O.), August 2d.—John Ball, 13 years old, who has been in jail for six weeks on a charge of killing his mother, has made a confession. On June 13th the boy was at home alone with his mother at the farm-house, and about 4 o'clock he alarmed the neighbors by saying that three tramps had killed his mother and that he was asleep, but was awakened in time to see them leaving with a watch and money. The watch has since been found where he admits that he hid it. He had shot his mother twice and then nearly beheaded her with an ax. It is supposed he was with the dead body three hours before giving the alarm. No motive for the crime is assigned, except he was angry at what seemed to him to be evidences of favoritism shown to his sister by their mother. Butchered His Mother.

New York, August 2d.—[Special.]—An interesting exhibition is promised by the New York Electrical Society, which promises to be on a great scale. The Society has already received applications for 12,000 square feet of space, and for 700-horse power to operate the exhibits. Among them will be 2,500 incandescent lights, 200 are lamps, 300 motors, several storage batteries and three electric railways, besides countless miscellaneous inventions. Special interest is manifested in electric motors. The manufacturers say there is no business in the country is manifested in electric motors. The manufacturers say there is no business in the country more active than theirs to-day, although it is, as a commercial development, practically the growth of but one year. There are now 10,000 electric motors running in this country, nearly all of which are of the electric light circuits, which now have double duty to perform—supplying power by day and light by night. One company is building motors of 4,000-horse power, and has more orders ahead than it can fill for months. Another company, making smaller sizes of motors, has built 2,500 since last November. The tendency now is towards using the larger sizes up to 25-horse power.

The Detroit Daily Tribune is regularly printed by electric motor power, and motors my be found in many newspaper offices. More than a score are now running freight and passenger elevators in this city. A motor in Detroit, Mich., is driving the machinery of a knitting mill that employs 2,000 hands.

Motors in all parts of the country are used on dental lathes, ice-cream freezers, fans, ventilators, sewing machines, drills, polishing machines, laundry apparatus, etc. In a Western town a motor pumps water from an artesian well 600 feet deep. In Pennsylvania two motors are

HE WOULD TAKE IT. Would Support Blaine. New York, August 2d.—A special to the Times says: Recently the Express, of this city, printed some reminiscences of Hon. A. N. Cole, who claims to have been the father of the Republican party, and who for thirty years has been on more or less intimate terms with the great political leaders. In these articles there has been much concerning these leaders, and it appears that the papers containing the articles were forwarded to Mr. Sherman. The latter found time to write the following decidedly pointed letter:

"Mr. Cole: I have read with deep interest what is said in the Express of July 10th in reference to Blaine's opinion of myself. It is quite true, as Mr. Blaines ays, that he and I have always had the highest regard for each other. We were both presented as candidates in 1880, but then scores of Mr. Blaine's friends in Ohio made the fatal mistake of dividing the containing the articles were for language which, beside this, sinks into Insignificance.

In these articles there has been much concerning these leaders, and it appears that the newer containing the articles were for

fatal mistake of dividing the Ohio delegation and refused to vote for me, but voted for Mr. Blaine. This not only defeated me, but prevented a concentration of the Ohio delegation in favor of Mr. Blaine. On the night before the last day of the Convention, he said he hoped the Ohio delegation would unite upon me, and, if so, my nomination would follow as a matter of course, but so much feeling had been caused by the division that it was found impossible, and was only reconciled by the nomination of General Garfield. It may be that the same division will produce a like result in the approaching canvass. I certainly have no objection to the nomination of Blaine, and if he is nominated I will do what I did in 1884—do all I can to secure his election. He is more injured than benefited by the activity of his friends, in making divisions in Republican States."

By some it is considered that the special significance of this letter is the fact that it indicates no change whatever in the fair rivalry and candid relationship which has long existed between sherman and Blaine. It is held to mean that John Sherman will get the Republican nomination for President next year, if he can, and if he cannot he will be glad to see it fall to James G. Blaine, and that should the honor fall upon Sherman it may be taken for granted that the statesman will have the hearty support of Blaine of Maine.

Like a Lot of Boobies.

Paris, August 2d.—Boulanger's seconds publish an account of what they say transpired at the conference between them and the seconds of Ferry. The report is in substance as follows: General Boulanger desired a serious reparation, one properly proportioned to the gravity of Ferry's affront. On this account he proposed that the combatants should exchange shots until one was hit, the choice of distances to be left to the seconds of Ferry. These conditions being accepted, Boulanger's seconds agreed to be content with an exchange of shots between the principals at twenty paces, without any word of command. Considering this proposal to embody the extreme limit of General Boulanger's instructions, his seconds did not feel authorized to make any further proposition. Ferry's seconds would only accept a duel at twenty-five paces, with a single exchange of shots; the fire to be opened at a word of command. Thereupon, as the offended party has the right to dictate the conditions of a duel, without being obliged to submit to terms dictated by his adversary's seconds. Boulanger's seconds withdrew from the affair.

PARIS, August 2d.—Ferry's seconds confirm the statement that they were unable to come to an agreement respecting the conditions of the duel between their principal and General Boulanger. They explain that they proposed the same conditions as those under which General Boulanger fought with Baron Laereinty, and that Boulanger's seconds refused to accept such conditions, claiming that they had the right to settle the details of the affair. M. Ferry's seconds declined to admitthe claim of the offended party to settle the conditions. A GOOD WAY OUT OF THE SCRAPE.

age of hard facts and coin is put forth once more to make Niagara Falls pay its way. The conversion of the forces of nature into motive power for the wheels of commerce is not in this day checked by the sentimental or poetical attaching to any scene of beauty, or to the lofty grandeur of any stupenduous work of nature. Yet this is precisely what is going to be done. New York, after infinite trouble, has driven back the offensive shop and jury she was inflicting upon an innocent booth, the peddler's cart and vagabonds' peep-shows and the hundred-and-one catch-penny concerns which fringed the whole Niagara border. Scarcely has that great work been accomplished, when there comes a Buffalo scheme that is well on the road to success, and will probably be carried out, Niagara to the Buffalo boom."

The Business Men's Association of Buffalo is at the bottom of this sacrilege, and will probably accomplish it, and soon have noble Niagara operating wheels and turbine buckets, and hydraulic contrivances and electrical motors of what order and in turn coffee mills and operate factories, pull about cable cars, lift sugars and lower hams; to blow the sooty furnaces of iron works and rattle off editions of staid Buffalo daily papers. It is thus that the practical, thrifty, penny-turning Buffalonians propose to knock the poetry out of Niagara and prevent a "mighty smart" water privilege from longer running to waste.

As a matter of fact there are colimns in the vestibule of the Capitol at Washington, beneath the office of the Marshal of the Supreme Court, that are not only wholly original and American, but are distinguished by remarkable grace and loyalty to the lines of beauty. The pillars consist of cornstalks, free from leaf, so arranged that the joints of one stalk stand a little above the preceding one, and thus The originator of these columns was Bensamin Henry Latrobe, at one time archipillars has been attributed to President Jefferson, but Ashton, by producing a letter from Latrobe to the President, dated August 28, 4809, proves Latrobe to have been the originator. The way to teach these women the folly of such conduct, and to oring them to a realization of their shame lessness, is to withdraw sympathy from them, refuse them countenance and ignore them, precisely as model artists expect to be ignored by society. A few severe lessons in social ostracism, firmly delivered, will put a stop to this business of nude

SENATOR STANFORD APPEARS BEFORE THE COMMISSION.

SAN FRANCISCO, August 2d .- The petition of

the Pacific Kailway Commission was presented before the Circuit Court this morning. The order to show cause why an order should not be granted directing Frank G. Bouty to produce produce a spiral effect, band-like, around the beoks demanded by the Commission was the column. The capitals are composed of granted by Judge Sawyer and made returnable ears of corn, with partly opened hasks. Peld and Judges Sawyer and Hoffman. The examination was resumed by the Railvay Commission at the Palace Hotel soon after tect of the Capitol. The design of the 10 A. M. Senator Stanford appeared and resumed his testimony. He began by presenting a statement of the financial aid received from the Government to construct the Central Pacific the Government to construct the Central Pacific Railroad. He said, as preliminary to this, that he inferred from remarks made by the Commissioners that they did not think in receiving this aid that the Central Pacific Company occupied toward the Government the position of an independent contracting party, but was, in some way, acting as an agent in a fiduciary capacity. The Courts have repeatedly held that the bonds and lands granted by the Government became the property of the company upon compliance and lands granted by the Government became the property of the company upon compliance with the Acts. Several actions have been prosecuted by the United States upon the theory that the Government could compel an accounting with the Central Pacific for the disposition of the bonds issued by the United States. He quoted an opinion of the Supreme Court of the United States in which this theory was overturned and an accounting refused. This decision was rendered in a Connecticut case. The same doctrine was affirmed by the Court of same doctrine was affirmed by the Court of Claims, and in construing the Thurman Act the Supreme Court all through assumed that the

With the foregoing funds the road was built to Ogden, 860.66 miles, or \$55,600 per mile. They could not expect any more than this, for there was no more to expend. The witness said Engineer Judah estimated that the road would cost \$90,000 per mile, and other engineers thought it could not be built for less than \$100,000 a mile. He thought no Board of Engineers, taking into consideration all the circumstances, would put a lower estimate on the cost or estimate that \$55,000 per mile was unreasonable. The first mortgage bonds and the Government bonds granted realized \$41,485,000, so that if the Government aid and the product of the first mortgage bonds had alone been sufficient to build the road, it would have cost about \$45,200 per mile. He therefore argued that even if the per mile. He therefore argued that even if the central Pacific Company was compelled to account for its expenditures to the Government his would show that the aid granted was insufficient to build the road, and that upon that basis the Government should make good the leftieiner.

Referring to aid granted by counties to the Central Pacific, Mr. Littler read from a list counties which voted to aid the California railroads the names of Yolo, Yuba, Solano, San Mateo, Les Angeles, San Joaquin, and several others, the same aggregating \$2.265,000, and asked if any of these should be included in the statement given by the witness.

Senator Stanford said that none of these concerned the Central Pacific. In some cases the money authorized under Acts of the Legislature by the counties referred to was never raised, and where it was, it went to roads other than the Central. Perhaps some of the roads so built were now leased by the Central, however.

This remark took the Commission by surprise and Mr. Anderson asked if the books of the corporations which had dealings with the Centra Pacific were also open for inspection?

Senator Stanford—I am ready to use my influence to have the Commission examine any books. nce to have the Commission examine any books be have as to the Central Pacific Railroad, but we dations with many individuals. The ts we do not wish to be laid before We do not want these books and par public. We do not want these books and papers thrown open to the general examination of everybody. So far as the Commission is concerned, we have no objection to its seeing anything that it pleases. We know it to be composed of honorable gentlemen, and I know that it will not expose to the public matters of a private nature. I would like to put my offer in writing and submit it to the Commission for its consideration. So far as the Central Pacific is concerned, I want all the light thrown upon its transactions and affairs that is possible to obtain, and the Commission cannot be more desirous upon that point than I am.

Mr. Anderson—Senator, do I understand that his offer includes an inspection of the books of the Western Development, Pacific Improvement and other companies which have had dealings with the Central Pacific?

THE OFFER ENLARGED.

THE OFFER ENLARGED. Senator Stanford: "So far as those books re-te to the affairs of the Central Pacific, we are no objection to their being opened to your espection; but, as I have said, we can I think

ompany to the public, and we are destributed to the public, and we are destributed to the most of it."

Mr. Littler—Well, Senator, I hope you will the work whole case in. Mr. Littler—Well, Senator, I hope you will put your whole case in.

Senator Stanford—That is what we desire to do. There have been times—not many years ago, too—when we might as well have whispered in a hurricane with the expectation of being heard as to have attempted to defend ourselves before the public. Now that the atmosphere is calm, we propose to make the most of it, and we shall endeavor to aid the Commission in every way. So far as you are individually concerned, gentlemen, we have no objection to REMARKS OF COUNSEL.

Mr. Cohen thought the Commissioners should

be examined at leigure. This request was anted. The examination of Senator Stanford was then continued.

Mr. Andrewson Senator, you have alluded several tit, as to other transcontinental roads which have interfered with the savings of the Central Pacific. Do you mean to say that the Government should have left this whole west-

An country undeveloped until such time as you had earned money to pay your debt?

"No, sir: but if they have done anything to injure us, the Government should compensate us. We say that the Government, has been benefited largely by this road, and it seems wrong for it to go to work and deprive us of the profit which we might reasonably expect."

Is it not a fact that between the years 1870 and 1876 the net earnings of the Central Pacific were \$50,000,000?

"Yes, I believe they were, but that sum includes earnings of the unaided branches, as well as the aided reads."

The question of railroad lands was then taken up and speaking on this subject Senator Stan ford said: "As for land, if the Government i ford said: "As for land, if the Government is apprehensive on that score, we are willing to turn all the land that we own, from the Sacramento river through to Ogden, back to the Government for the price which their agents would put upon it. We are willing that this should go toward payment of our debt. I believe if the Government would give us what is justly our due, and release the branches which have been added since that, we would be willing to turn the road over to the Government." the road over to the Government."

A letter was here read from United States Dis-A tetter was here read from United States Dis-triet Attorney Carey stating that unless the mo-tion on the application of the Commissioners to produce the books was heard to-morrow morn-ing, he would adjourn it until the return of Jus-tice Field, which would be about the 20th inst. The road ad been built partly with money given by the ceneral Government, every dollar of which had been put into the enterprise. When completed he stock was worthless; it could not have been sold for five cents on the dollar, and he could not see what interest the Government had in it whether the stock was divided into 1,000 or 100,000 shares? Since ts construction the road has developed population and business which has made its stock valuable. With that he thought the Government had nothing to do. The books of the Central Pacific were open to inspection and the Commission was at liberty to examine them. There was nothing to conceal and he wanted the light thrown upon everything concerning the construction of this road. An objection has often been urged to State Fairs in California, perhaps with some show of reason, that they are only a disguise for horse-racing, and that the fair, in the best sense of the word, is subordinated to the pool-box. Our visitors will want to be satisfied that we can raise something in the live-stock line besides running and trotting horses. The department responded promptly, and found three small frame buildings in a blaze on the west side buildings burned like tinder, and the blaze lighted up the streets for blocks in every direction. The cinders rose to a great hight, and for a few moments a general conflagration was feared. The buildings were very small and the fire quickly put out. Hundreds of people came from every portion of the city more to see the maneuvers of the Fire Department than the fire. Chief Sullivan was there, so was his assistant, O'Meara, and the work of putting out the fire went on just the same as though there was no disagreement in the Board of Fire Commissioners. County Hospital Report. Dr. G. A. All fees have been accounted for, to the amount of \$11,498.

The expert takes occasion to criticize the bookkeeping of County Superintendent Bishop on account of system only. The books are correct in all footings and totals. There were some abuses apparent during the past which the present Superintendent has remedied, such as drawing money at the expense of some other fund or district. No warrant should be drawn unless there is money in the fund to pay said warrant. The cash in the School Fund aggregates \$20,219 60.

The Treasurer's books were reported correct and in accord with those of the Auditor.

Douglas and L. W. Walker, and families, can make the public or a jury believe that Mrs. Moore is troubled with dementia or sottening of the brain. "A woman who manages," says he, "successfully a rich landed estate, and two-thirds of the irrigation system of the rich and prosperous county of Yolo, certainly has sense enough to decide for herself in the matter of matrimony, even at the age of 60."

The opinion is quite freely expressed that the opposition of relatives to Black as a step-father comes from the fact that the Moore estate figures up into the thousands and will probably net more than \$300,000. This is a nice little financial plum, and Black is not the ideal relative to pluck it in the opinion of several

The State Pair. [S. F. Examiner.]

The coming State Fair, which will be held at Secramento in September, is likely to be one of the most interesting events of the kind ever held in California. One at preparations are being made by agriculturists and fruit-raisers in different parts of the S ats to be well represented, a new incentive being given to their efforts by the grouping of the products of the various counties, which will cause a greater effort to excel in the exhibits. The success of the Pacific coast racing stock at the East within the last two years, will extract the presence of prominent turfmen of the Atlantic slope. Large numbers of fine cattle from the stock-breeding farms of Illinois, lova and Colorado will be in the lists to comest for premiums with the representatives of native herds. The wine display will also be extensive, and comprise all the varieties produced in the State. The Fair will not only attract a great rush of visitors.

Nor is it-less effective as a remedy for rheumatism than as its preventive, a fact as amply attested as any other relating to its curative properties. Mariners, miners, frontiersmen, and others, have ever found it a faithful preservative of health in unfavorable regions, and a benign remedy for malarial disorders, and stomach, liver and bowel complaints. It is a fine promoter of appetite and a capital tonic.

A Toilet Luxury

In every respect, Ayer's Hair Vigor mover fails to restore the youthful freshness and color to faded and gray hair. It also prevents the hair from falling, eradicates dandruff, and stimulates weak hair to a vigorous growth.

Five years ago, my hair, which was quite gray, commenced falling, and, in spite of cutting, and various preparations faithfully applied, became thinner every day. I was finally persuaded to try Ayer's Hair Vigor. Two bottles of this remedy not only stopped the hair from falling, but also restored its original color, and stimulated a pew growth inal color, and stimulated a new growth

FRUII—In the present condition of the market it is not easy to give a guiding quotation. Receipts are coming to hand from all directions, and there is not enough consumptive demand to absorb half the amount that arrives. Canners are largely supplied direct from orchards, and they cannot be relied on to buy up local surplus. It is not surprising, therefore that

ners are largely supplied direct from orchards, and they cannot be relied on to buy up local surplus. It is not surprising, therefore, that prices are irregular and unsettled, for competition to sell brings down values be almost nominal figures.
